***WSC launches E TCR  
A new concept for Touring Car racing***

WSC Technology Ltd., a subsidiary of WSC Ltd. the body behind TCR, has launched E TCR – a new concept of Touring Car racing vehicles solely powered by electric motors.

The Cupra E-Racer that will be exhibited at the Geneva International Motorshow is the first electric vehicle for Touring Car racing built in total compliance with the E TCR Technical Regulations.

WSC Technology plans to organize promotional and media events during the 2018 season before launching a racing series.

Further details will be unveiled next week.
